# Alpha Laboratories:

## Your Industrial / Pharmaceutical Laboratory of Choice.

### **Proven Quality Management System.**

Our quality management process has been developed and refined over our 42 years in business.

### **Experienced & Highly Qualified Staff.**

Alpha Laboratories employs a staff with both a deep understanding of analytical services and testing and an extensive knowledge of your industry – offering our clients the best of both worlds.

### **Value Added Services.**

Our services are competitively priced, while maintaining the highest quality of testing and standards.

### **Excellent Turn Around Time.**

With over 42 years of experience, Alpha Analytical Labs, has created a proven methodology that consistently meets and exceed our customers' expectations for prompt efficient turn-around times and service.

### **Dependable Customer Service.**

Alpha's success is based on building long term relationships. We adapt our customer service model to meet your needs – not the other way around.

# Industries Served

*Alpha Laboratories provide a comprehensive range of latest and traditional Analytical Chemistry services to the Pharmaceutical, Biotechnology, Medical Device, and associated industries. Alpha is well-appointed with advanced instrumentation to perform a wide range of chemical and instrumental analysis following procedures described in the USP, EP, BP, JP and clients' procedures.*

## Pharmaceuticals

Alpha Laboratories has been providing and continue to provide high quality analytical testing support to pharmaceutical companies over 43 years. We are trusted partners for several pharmaceutical organizations in Canada and the US.

We understand the demands of the global pharmaceutical sector in supporting analytical services both in chemistry and microbiology. We also understand the importance of quality testing as your product moves from prototype to the finished product.

## Cosmetic

Each year, Alpha Laboratories tests hundreds of products for shelf life, stability, and preservative effectiveness. We also provide routine microbiological quality testing to large cosmetic manufacturers for routine and non-routine analysis of Cosmetics, Personal Care products, Perfumes, Skin Care, Hair Care, Beauty Care, and Toiletries.

## Nutraceutical

Alpha Laboratories is leader in the analysis of nutraceutical, herbal, food, beverage, nutritional products and raw materials. Our analyses include heavy metals analysis, microbiological, US Pharmacopeia (USP) and AOAC methodologies, and USP disintegration and dissolution tests. Our high quality service also include analysis of fruit juices and other food products for adulteration. These tests will provide raw material suppliers, contract manufacturers, and food, beverage and nutritional manufacturers with the means to test for specific contaminants.

## Food

Alpha is the ideal laboratory for food quality testing for national and multi-national food processors and retailers. Food analysis covers the determination of heavy metals, pesticide, preservatives, and microbial contamination. Our expertise helps customers diminish risks and guard their brand reputation at every stage of the process.

# Alpha Analytical Laboratories Offering Comprehensive and Dependable Analytical Services for Over 42 Years.

Alpha Healthcare's Analytical Laboratories Division has the people, technology, and expertise to help you meet regulatory requirements for your pharmaceutical, cosmetic and food product(s).

Our state-of-the-art labs are highly equipped to meet a broad range of testing and analysis procedures. Our laboratory information system is used to tightly control and document processes and results to ensure traceability and compliance.

## Alpha Healthcare Inc.

**Alpha Healthcare Inc.**, our Canadian privately-owned parent company, was founded in 1971 with a focus on making the lives of healthcare professionals easier by providing them with a patient focused source for quality healthcare services. We started as a small Ontario-based laboratory, and, over several decades, we quickly grew into one of Canada's leading healthcare services companies with more than 250 employees and a broad range of high quality, integrated patient centered service offerings. Today, Alpha has offerings in several areas including **Medical Testing Laboratories, Diagnostic Imaging Clinics, Medical Arts Facilities, Industrial Quality Assurance Labs and Information Technology Solutions**. Alpha applies their decades of experience, commitment to research and innovation, and personal touches in everything they do to enable health care professionals deliver superior patient experiences.

The laboratory's team of dedicated staff, directors, research personnel and scientific consultants are experienced in meeting a broad range of technical challenges and committed to achieving the highest level of quality.

**Alpha can help you shoulder the responsibility of providing the best product possible with accurate, timely and high quality analytical services.**

## Alpha Laboratories

**Alpha Laboratories** delivers high quality health service to healthcare professionals and patients. From our origins in medical laboratories and pharmaceutical product testing for over four decades, to our current evolution into a diverse group of companies, that encompass: Medical Diagnostics, Diagnostic Imaging, Analytical Testing and Medical Art Centres, we are committed to placing patient health first in our research, products and services.
